LOUIS TELLIER

NOTHING REPLACES HANDMADE

LOUIS TELLIER represents the combination of three renowned French culinary tool companies: Gobel (maker of copper and tin-plated pastry molds), Bron Coucke (famous for its mandoline slicers), and Louis Tellier (recognized for its stainless steel and tin-plated food mills).

LOUIS TELLIER is an undisputed leader in the field of high-end manual kitchen equipment, utilizing traditional know-how and adding a passion for innovation.

Beginning with the fabrication of metal molds by Etienne Gobel in 1887, LOUIS TELLIER has a long and proud culinary tradition. LOUIS TELLIER utensils supported the work of Auguste Escoffier and many other great chefs around the world, revolutionizing the way in which dishes were prepared. Today, LOUIS TELLIER continues the great heritage of French cuisine. Used in over ninety countries, these products continue to produce, as they always have, beautiful hand crafted culinary creations.

As a complement to the stainless steel mandolines produced by Louis Tellier, the slicing tools of BENRINER are offered in this catalog. BENRINER CO., Ltd., established in 1945, is a Japanese manufacturer of high quality ABS plastic mandolines and turning slicers.

PROFESSIONAL FOOD MILL X3

LOUIS TELLIER

Made in France

Ø 1.5 mm sieves: for sauces and coulis.

Ø 2.5 mm sieves: for purées, soups and compotes.

Ø 4 mm sieves: for fish soups and stringy vegetables such as leeks and spinach.

Double crushing giving an output of 3.3 lbs / min

Can be fully disassembled for perfect hygiene

Stainless steel

Can be used **for up to 20 people**

Good stability thanks to to the retaining brackets

In 1947, Louis Tellier revolutionised the world of cooking by creating the first professional food mill.

The LT food mill was soon a runaway success with restaurateurs. In a smaller-sized model, the LT mill brought purées, soups, compotes, and coulis within everyone's reach.

Always as effective and robust, in its 65th anniversary year, mill no. 5 contributed to the record for the world's largest potato purée which was set on 29 September 2012 using Joël Robuchon's famous recipe.

COMPACT-PRO MANDOLINES

LOUIS TELLIER

Made in France

Ref. BRONCP01

Ref. BRONCP02

Relying on its know-how, Louis Tellier designed the new Compact-Pro mandoline range, the perfect mix of French and Japanese cultures.

The Compact-Pro mandoline is profiled, it can therefore be installed on 1 or 2 sides of a container (GN1:1 or 1:2 container, salad bowl, mixing bowl, etc.) for horizontal slicing.

COMPACT-PRO BASALTE MANDOLIN

Light and compact. Cutting thickness adjustable from 0.019" to 0.39". Cutting width 3.75". Diagonal, honeycomb blade. Includes 2 comb-cutters (Julienne 0.15" & french fries 0.39") and, a patented ergonomic hand guard. Non-slip foot. Handles. Ideal for horizontal use. St/st, PP material. Made in France.

LE ROUET® GOURMET TURNING SLICER

LOUIS TELLIER

Made in France

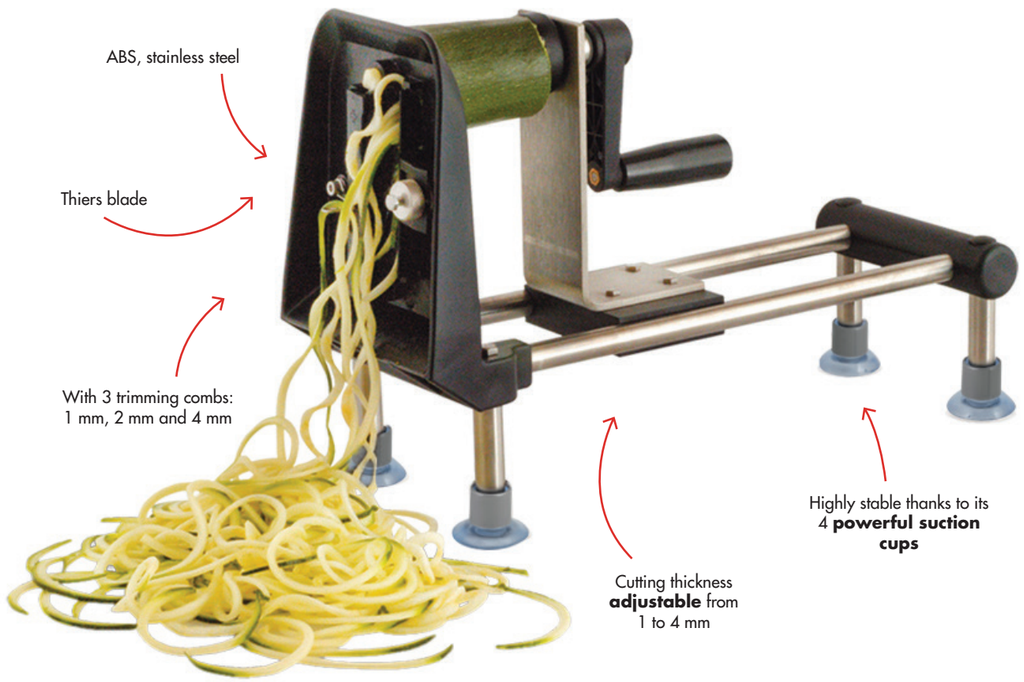

Spaghetti and angel hair

Juliennes and tagliatelles

Create tagliatelle, spaghetti, and julienne-cut fruits and vegetables with just a few turns of the handle. You will easily make coleslaw, rösti, and grated potatoes.

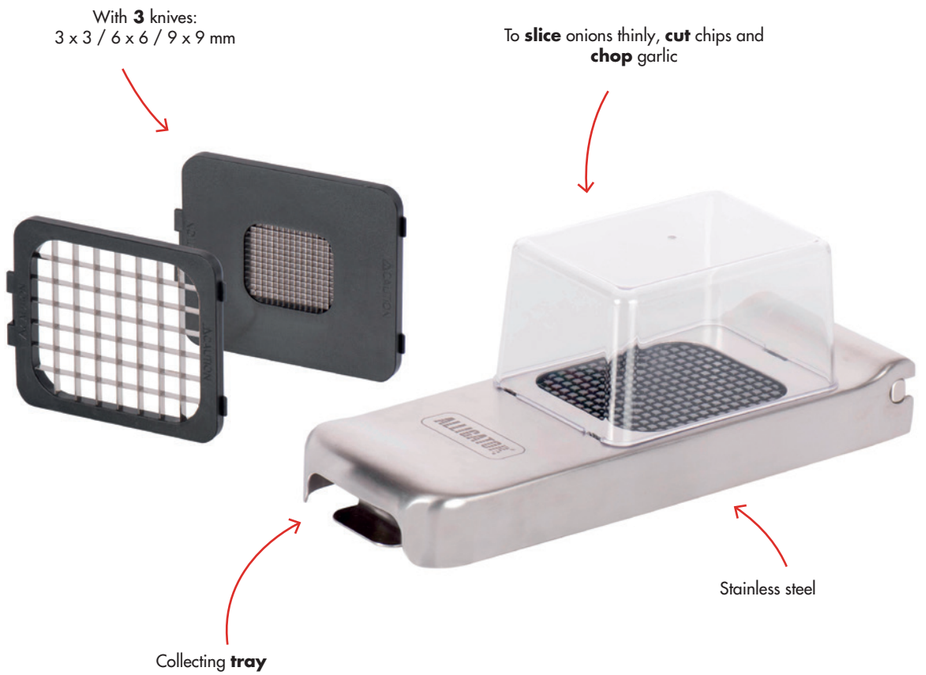

Tailored to a wide variety of fruits and vegetables, including firm-fleshed ones, like carrots, celery, onions, courgettes, cabbage, apples, etc.

ST/ST MULTI-CUTTING CHOPPER KIT

ALLIGATOR

ALLIGATOR

In 2001, the inventor Benny Engdah designed the Alligator out of a wish to make it easier to prepare his favourite Swedish dish: Kroppkakor, potato balls garnished with sliced onions and bacon.

He registered a patent, and success quickly spread worldwide: the ease of using the revolutionary vegetable cutter won over professional chefs as well as individuals.

Pierre Tellier, as a manufacturer of professional devices for cutting fruit and vegetables, was naturally won over by the small, efficient, and space-saving device, and introduced the Alligator to France in 2005.

The Alligator vegetable cutter stands out by its robustness as well as the quality of its blades and grills.

PEELER FOR INSTITUTIONAL ESTABLISHMENTS

LOUIS TELLIER

Made in France

For carrots, large carrots, and cucumbers !

Interchangeable **heads**

Quick and easy

Perfect **peeling**

No loss: fine peelings

Our peelers will win you over with their many qualities:

ELECTRIC CAN OPENER FOR COMMUNITY CATERING

LOUIS TELLIER

Made in France

IP41

Professional electric can opener for community catering of between 300 and 800 covers:
- Made from rustproof materials. For reasons of hardness, the wheel is made from tempered steel and treated against rust.
- Two-speed motor protected by a Duralinox cover.
- High-output geared motor.
- All-metal reduction gear (metallic gearing mounted on ball bearings).
- "Motor - opening head" unit with vertical movement assisted by a gas spring enabling effortless positioning depending on the height of the can to be opened.
- Can-height adjustment stop.
- Wearing parts (blade and wheel) can be replaced by non-qualified staff.
- Tabletop device: stainless-steel base and 4 suction cups.

*Motor details:
230 V single-phase - 50 Hz / 60 Hz
Rating: 75 W - Torque: 13 N/m
Metallic pinion gear

ELECTRIC CAN OPENER

Free-standing. 2 speeds. Assisted vertical movement. Opens all cylindrical, rectangular and dented cans from 2" to 10.62" in height. Easy disassembly and cleaning. Complies with NF (French Standards) and HACCP. Includes reversible double-life blade, 1 wheel, 1 metal brush and 1 magnet to retrieve the lid. Base includes 4 suction pads. 60Hz, 110V. St/st material. Made in France.

SAFETY MANUAL CAN OPENER

LOUIS TELLIER

Made in France

Opens round cans of all sizes by cutting the external seal: edges are neat, and there is no risk of cutting oneself. The can's cap can be reused to protect its contents from dust and splashes (the cover no longer offers hermetically-sealed conservation).
Its weight enables it to be stable on the tin and ensures optimum guidance.
The head design limits wearing parts as well as gaps where dirt may become lodged.

Available with a clamp plate or a screw plate.
Dishwasher-safe.

STAINLESS STEEL CAN OPENER - SMOOTH EDGES

Open round cans of all sizes (e.g. 5/1) by cutting the outer seam. The edges are smooth, no risks to cut yourself. You may reuse the lid to protect its content. The closure will no longer be airtight. To fix on a table. St/st material. Made in France.

BRASERO - TABLE BARBECUE

LOUIS TELLIER

Made in France

Professional quality and robustness:
- **18/10 stainless steel** = does not rust
- Thick polished **stainless steel grid**: non-deformable and reduces food adhesion

Can be fully **disassembled** for easy cleaning

Perfect stability for more safety thanks to its weight and solid beechwood base

Lower insert for reserving or heating dishes or pans

Functional:
- Lighting speed: ready to use in **10 min**, **20 min** for embers
- 1 removable **charcoal burner** for preheating or reserving the embers out of the table
- 1 ignition gel receptacle to **boost** the ignition

This outdoor barbecue can be placed in the centre of a table to cook ribs of beef, fish, skewers, etc., on a lawn, around the swimming pool, at the foot of your fishing rods, and anywhere you want according to your imagination!

It has only one side open to avoid catching the wind for optimum safety.

It is easy to store because of its size and its square block.

OUTDOOR WOOD OVEN MARCEL BY LOUIS TELLIER

LOUIS TELLIER

The MARCEL outdoor wood oven stands out by the technology of its patented flame block valve system, which enables it to precisely control all types of cooking:

Valve open: flashback covering the top of the firebox for fast cooking at high temperatures (450 to 500°C).

This system makes it possible to cook meat cuts and pizzas.

Valve closed: the rear firebox flame is blocked in the upper chamber of the oven which makes it possible to control and maintain temperature for inertia cooking (150 to 250°C).

Makes it possible to bake breads, as well as cook meat, slow-cooked dishes, fish, vegetables, pastries, etc.

MARCEL OUTDOOR WOOD OVEN

Authentic cooking for outdoor events. Professional quality, versatile and easy to use. High-temperature cooking: 842-932°F (450-500°C). Open valve reaches 932°F (500°C) in less than 20 minutes. Stainless steel exterior with internal ceramic fiber insulation. Made in Turkey.

NON-STICK COATING

"THE EASY WAY"

QUICK AND EASY DEMOLDING

- Fat-free, perfect demolding
- Two-layer, non-stick coating, guaranteed PFOA- and PFAS-free, professional quality

VERY GOOD HEAT DIFFUSION

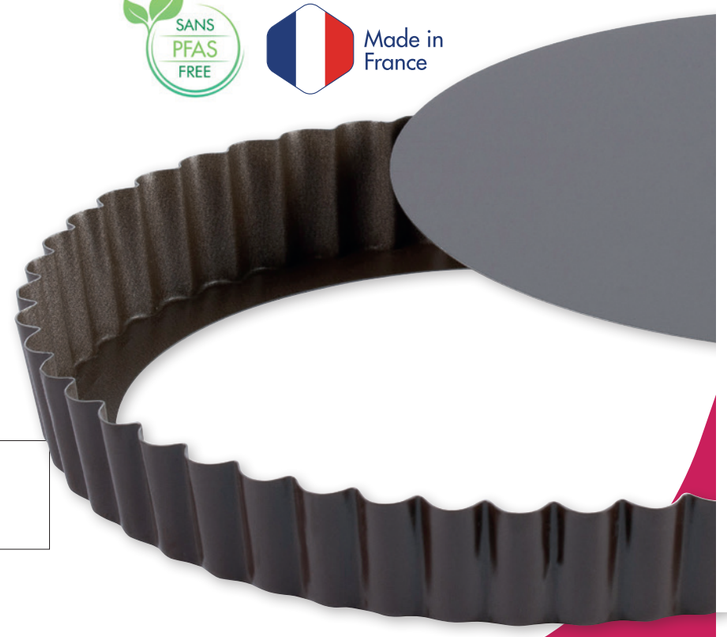

- Impeccable and uniform cooking
- Good conduction due to its non-stick coated steel material

RESISTANT TO HIGH TEMPERATURES

- Heating temperature up to 250°C
- Mold thickness of 0.5 mm: best compromise between robustness and cooking qualities

SANS PFAS FREE

Made in France

CHEF'S TIP

To maintain the quality of the non-stick coating, avoid scratching it. Thus, cut the preparation outside of the mold whenever possible.

CLEANING

- Clean before first use
- Prefer hand washing
- Wash with soapy water

NON-STICK

TART MOLD

SANS PFAS FREE

GOBEL

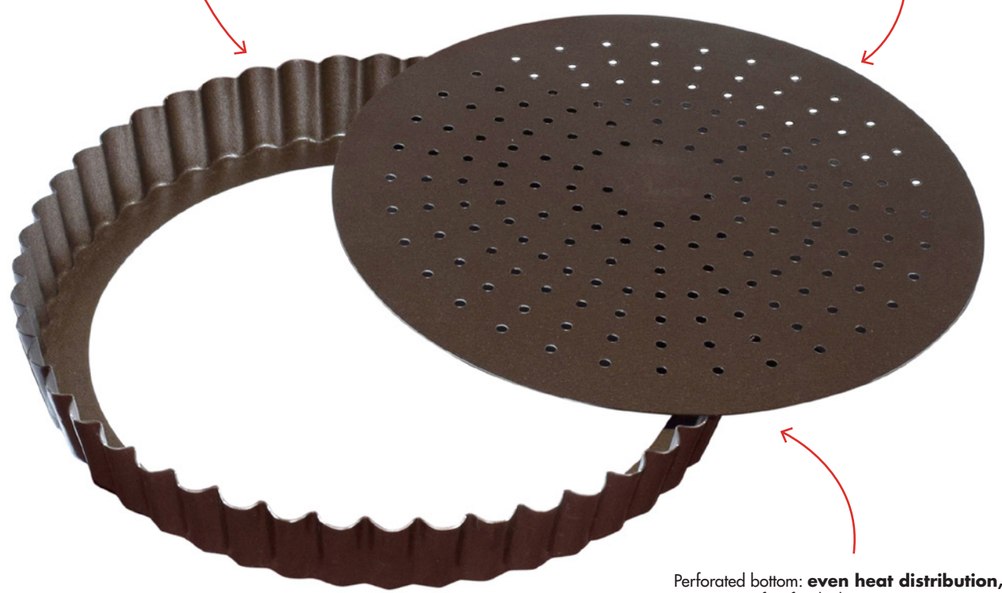

Made in France

MATÉRIAU-MATERIAL RECYCLABLE SAIN / HEALTHY

Two-layer non-stick professional quality coating for perfect demolding

Removable bottom: **easy demolding**

Perforated bottom: **even heat distribution,** perfect for thick preparations

Since 1887, the Gobel non-stick coating has been recognised for:

- Its excellent non-stick properties: much more efficient than a monolayer and ensures perfect release.
- Its good resistance to abrasion: the two-layer finish makes it possible to load the top layer with mica, making it less fragile.
- Its longevity: the thicker coating ensures an increased longevity.

GOBEL

Made in France

MATÉRIAU · MATERIAL RECYCLABLE SAIN / HEALTHY

Removable bottom: easy demolding **every time**

Tinplate: recyclable **material**

Exceptional heat **conductivity**

Perforated bottom: **even heat distribution,** perfect for thick preparations

Since 1887, GOBEL has placed at your service all its experience and know-how in manufacturing tinplate molds. Today, it is one of the last mold-making workshops in France that continues to crimp its molds in this eco-material that offers exceptional thermal conductivity!

Guarantors of an unequalled tasting result, the molds are reputed for making dough crunchy: golden on the outside and soft on the inside, to enhance your pastry creations.

ADJUSTABLE CAKE RING

Ideal for making pastry and tiered cake recipes, it is the professional pastry chef's tool for making cakes, génoises, mousses, puddings, and vacherins.
Perfect for careful presentation of savoury dishes: tians, cottage pies, etc.

Instructions for use:
- tighten the handles to reduce the size of the ring, and loosen them to widen it
- move the loop to the left to lock the ring, and to the right to unlock it,
- use on a pastry plate covered with baking paper or a baking mat.

ADJUSTABLE CAKE RING

Adjustable stainless steel cake ring from 6 ¼" to 11".

PERFORATED RING

GOBEL

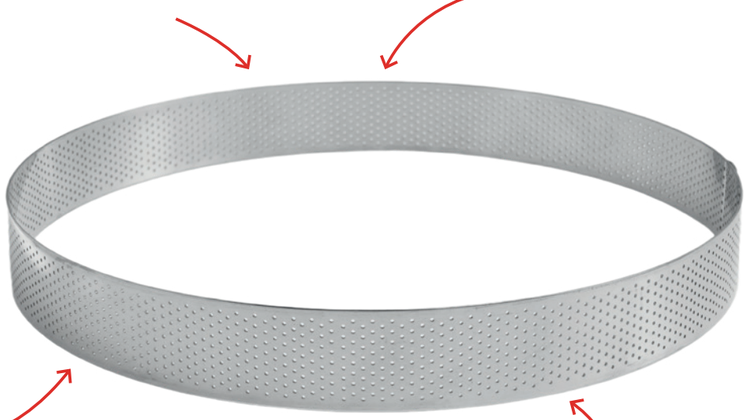

Made in France

NEW

The **micro-perforations** act as natural humidity regulators, thus avoiding any accumulation of water in the pastry, which makes it possible to obtain **crisp** pie edges, even with juicy fillings

Diameter and position of the perforations studied for **excellent heat** distribution **and** even cooking

Easy to demold:
the micro-perforations make it possible to remove the ring without the pastry sticking

No perforations on a 0.12" band at the top and bottom of the rings for **better pastry holding**
(no slumping)

The Gobel perforated rings guarantee even cooking and crisp pastry, thanks to the strategically positioned micro-perforations which ensure even heat distribution.

2 ring heights available: 0.79" or 1.4"

PERFORATED ROUND PASTRY RING H20

ROUNDED YULE-LOG MOLD

GOBEL

Made in France

Thanks to its silicone end pieces, the Gobel patented stainless-steel yule-log mold enables easy demolding whilst being watertight
This mold is indispensable for successful yule-logs.
It can also be used all year round for ice creams, terrines, aspics, tuiles, etc.

PASTRY SHEETS

PASTRY SHEETS 85

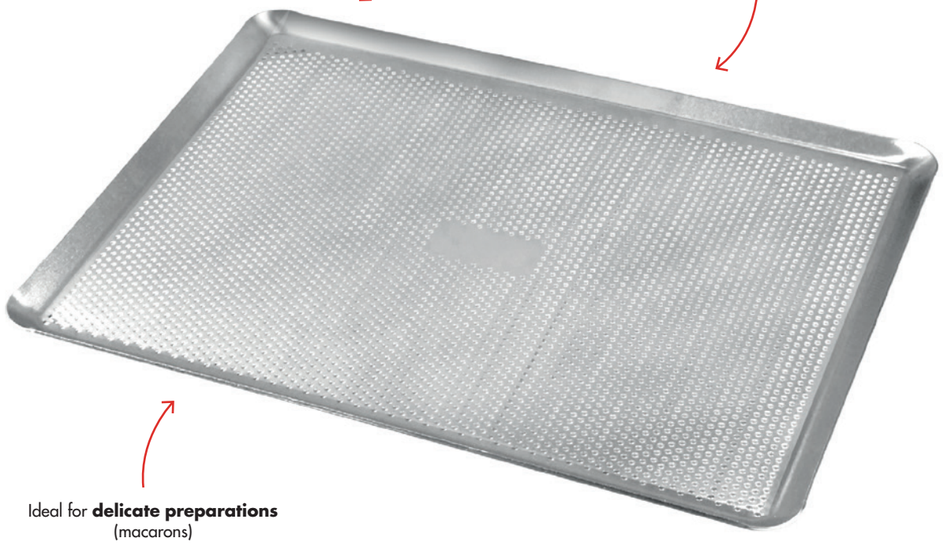

PASTRY SHEETS

GOBEL

Made in France

Micro-perforations
release excess humidity
to bake frozen dough
and preserve the crispy texture

Encourages hot-air circulation in the oven and around baking sheets

Ideal for **delicate preparations**
(macarons)

GOBEL's crimp-edged pastry sheets are available in stainless steel, aluminium, and non-stick coated aluminium.

Essential for baking, they can also be used as preparation and storage media in chilled cabinets and proof cabinets.

STAINLESS STEEL PASTRY SHEET

Stainless steel baking sheets are dishwasher safe, oven safe (maximum cooking temperature: 300°C), and can be used in the refrigerator (+6°C/-20°C). Ideal for storage.

NON-STICK ALUMINIUM PASTRY SHEET

The non-stick coated aluminum baking sheets combine the heat conductivity of aluminum with the excellent non-stick properties of a 4-layer coating, PFOA-free, making the use of baking paper unnecessary. The thickness of these sheets, the material, and the quality of the coating will allow you to use them for a long time and provide you with lasting satisfaction.

PROFESSIONAL WHISK

GOBEL

Unbreakable, untwistable **stainless steel wires**. Highly resistant to pulling (tested to over 176.4 lbs)

The curved* shape of the handle **enables washing liquid to be passed** and drained from between the wires

Whisk-rest **collar**

Perfectly and fully **watertight*** (compliant with the hygiene requirements of the supervisory authorities). Fully over-molded handle

Octagonal* upward-splayed shape **for maximum grip**: anti-fatigue and anti-tensing

Microtactile **insulating handle** that is pleasant to the touch. Suitable for contact with food

This professional whisk is light, balanced, and easy to use.
It meets all hygiene and cleaning requirements.
The ergonomic, watertight handle offers comfortable use and endurance.
Durable: adapted to intensive use.

STAINLESS STEEL TIPS

Universal compatibility
The weld-free tips are perfectly watertight and adapt to all piping bags without risk of tearing. Designed without rolled edges, they guarantee perfect hygiene. They resist hight temperatures and are dishwasher safe

Professional quality
Made of stainless steel, the crushproof tips are designed to be durable even with intensive use

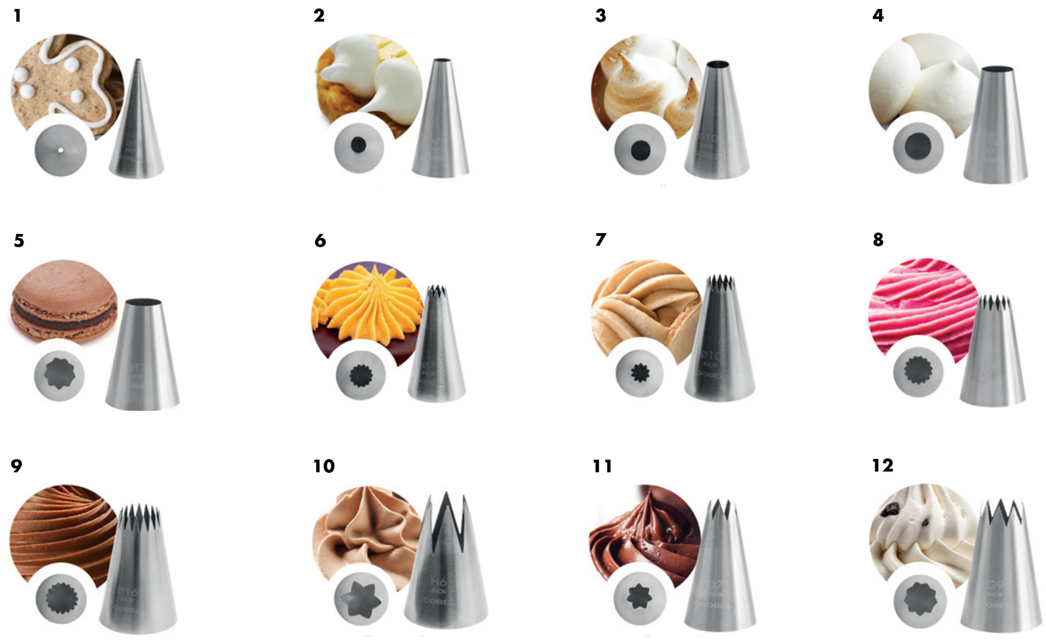

Multi-purpose
The wide range enables you to pipe all types of savoury and sweet, hot and cold designs

Identifiable
The markings on each tip makes it easy to identify the size / diameter

The Gobel piping tips enable you to decorate cakes, cupcakes, cookies and other pastries, as well as pipe creams, ganaches, icing and design artistic and personalised motifs.

They offer a varied combination of designs.

PROFESSIONAL ST/ST WHIPPED CREAM DISPENSER

100% **Stainless steel**

For **cold** and **warm** preparations (up to 70°C in a bain-marie)

Certified safe: complies with the French standard NF D21-901

Provided with **3 premium plastic tips** (tulip, straight, and fluted) with over-moulded stainless steel screw thread + 1 cleaning brush

The professional stainless steel whipped cream dispenser enables you to make light, cold or warm creamy preparations: whipped cream, sauces, foams, etc.

Available in 0.5L or 1L versions

Use with N_2O gas chargers (e.g.: ref.GL336, GL362 or ref. GL337)

The container is dishwasher safe

TINNED SIEVE

Cloth cone of fine woven **304-grade** stainless-steel, with 0.45 × 0.45 mm openings

Highly robust: a double seam fixes the cloth solidly **to the body**

Riveted **unit**

Deep **strainer**

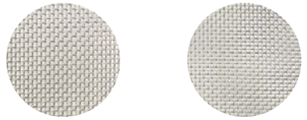

The hook, the brace, and the handle form a **single** piece

Gobel's fine tinned sieve is the essential professional tool for filtering all preparations (bouillons, coulis, emulsions, soups, sauces, etc.) to obtain an ideal texture without residue.

A beechwood food masher is available to facilitate the passage of the preparations (sold separately).

30 CM MESH SCREEN

2 meshes **available**:
No. 20 and 25

Stainless steel:
great **durability**
and **resistance**

Mesh no. 20 as standard
Interchangeable with mesh
no. 25 (optional)

Optimal mesh tension in both parts of the sieve thanks to the **fixing system**

The mesh screen perfectly separates your preparations thanks to its evenly distributed different size meshes:

Mesh no. 25 (mesh size 0.9 mm) is a fine grid for icing sugar, flour or cocoa.

Mesh No.20 (mesh size 1.1 mm) is a medium grid for almond or hazelnut powder.
It also enables you to filter sauces, coulis, jellies, as well as sieve purées or foam preparations.

The steel frame is reinforced, which prevents any deformation due to pressure, thus guaranteeing maximum stability and efficiency.

FLOUR SIEVE 3 PIECES

Ø 11.8". Optimum tension. 2 piece steel frames and one interchangeable mesh. Stainless steel material.
